

Trelleborg tires Recognized as Best Agriculture Tire at the 15th Visão Agro Centro-Sul Awards

- Trelleborg tires receive the **Best Agriculture Tire** award at the 15th Visão Agro Centro-Sul Awards, one of Brazil's leading agribusiness recognitions
- The recognition reflects the proven field performance of Trelleborg tires across demanding agricultural operations in Brazil

Trelleborg tires have been awarded **Best Agriculture Tire** at the 15th *Prêmio Visão Agro Centro-Sul*, one of Brazil's most established agribusiness awards. Presented during the ceremony held in Piracicaba, São Paulo, on July 14, the award recognizes companies whose technologies and solutions contribute to the continued advancement of Brazilian agriculture.

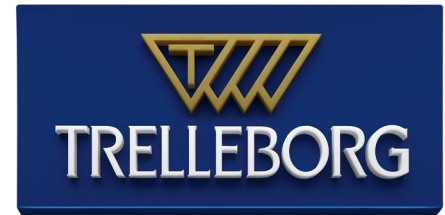

Rather than recognizing a single product, the award acknowledges the proven field performance delivered by Trelleborg Tires across a wide range of agricultural applications. Developed to meet the demands of Brazil's farming operations, the tires combine advanced engineering with consistent in-field performance, earning the confidence of farmers, contractors, dealers and OEMs throughout the country.

"Being recognized by professionals who work in the field every day is especially meaningful for us. This award reflects the confidence our customers place in our tires after experiencing their performance in real operating conditions. It motivates us to continue developing tire solutions that help customers maximize the performance of their machines and get more from every operation," says Fabio Metidieri, Sales Director Brazil – Trelleborg Tires.

As one of the world's leading agricultural producers, Brazil continues to raise the bar for productivity and operational performance. Built on decades of agricultural tire expertise and close collaboration with OEMs and farming professionals, Trelleborg tires continue to support this evolution with high-performing tire solutions developed to meet the specific requirements of Brazilian farming across its main crops and applications.

Press Release

16.07.2026

The Visão Agro Centro-Sul Awards recognize companies and professionals who contribute to the development of Brazilian agribusiness through innovation, technology and industry expertise. Winners are selected through technical evaluation together with votes from professionals across the agricultural value chain, making the award a respected benchmark within the sector.
